Governor Albert Brewer
Capitol Building
Montgomery, Alabama

Dear Governor Brewer:

The enclosed article, taken from yesterday's Tuscaloosa News, requires little explanation. Its significance is crystal clear, namely, if there is a better way to soften up youth or a generation of youth for a Communist takeover, we haven't heard of one.

You will note that we are told there is no connection between this crowd and the University. Then, why are faculty members, and even the Dean of Men, John Blackburn, allowed to take part? Of course, all of this has the tacit approval of Dr. Rose who for years has done his utmost in the most subtle manner to indoctrinate and subvert Alabama youth. From what we have seen in recent years, including the Ala. delegation to the Nat. Democratic Convention, he has been exceedingly successful in doing it.

Governor Reagan of California not only knows what is going on in higher education in that state, but is trying to do something about it; unfortunately, we have seen no comparable response here by either Gov. Wallace or yourself, although both of you have been informed of this development for a number of years. Must we wait until we have another Berkeley or Columbia to cope with?

Regardless of what he says, Dr. Rose and his Adm. are not for our way of life, not for Gov. Wallace, not for restoring our constitutional rights. He is an internationalist pure and simple.

We do appreciate your continuing efforts to rescue Ala. schools from federal control and hope that something can likewise be done to rectify the situation at our state-supported universities.

Very sincerely,

Ruth G. Altman
