Mr. George Wallace
Governor - Elect
State of Alabama

Dear Sir:

This is to urge you to reconsider your stand regarding the enrollment of James Meredith at the University of Mississippi. It seems incredible, at this time of world crisis, that men like yourself and Governors Patterson and Barnett, would seek to divide America. What more could Russia ask?

Negro and white students study in harmony at countless state universities throughout our great land. Of course, Alabama must be last in this venture, as she is in so many other things!

You must know that bloodshed, itself, will not prevent integration. It is here and intelligent people recognize it and are prepared to make it work for - rather than against - America!

You are frequently called "the little judge" - I pray history does not have occasion to remember you with the emphasis on the "little". This hour calls for true greatness not prejudice born of yester-years. Help unite our people for a great America.

A Concerned White Voter
