

She Has....

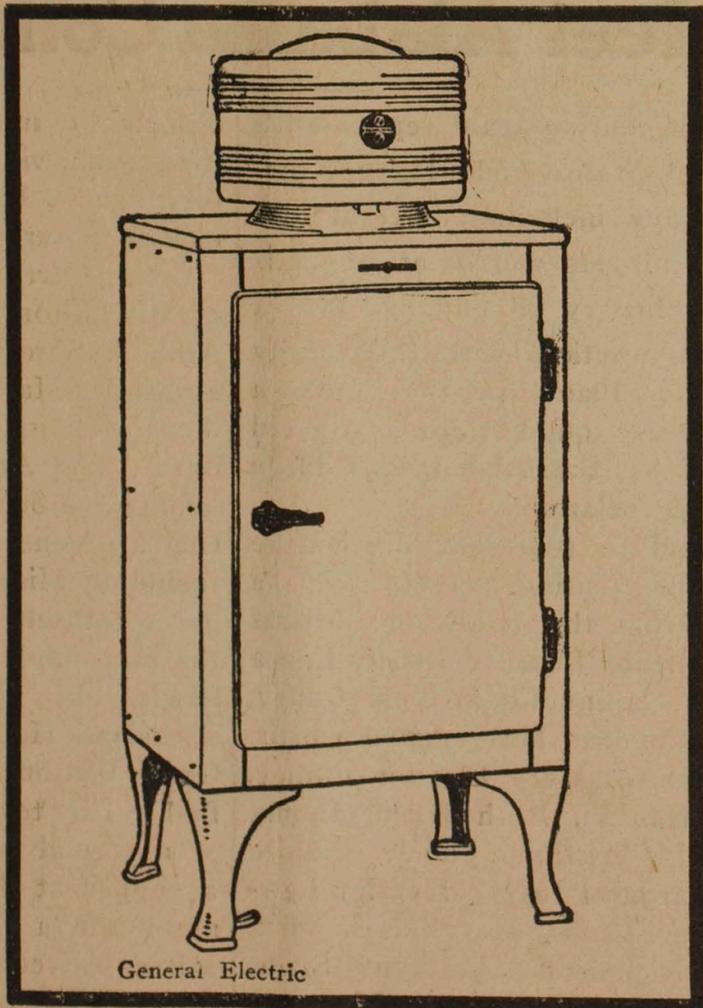

A RIGHT TO BE PROUD

SHE lives in a modest home--one built away back in 1920--but it isn't out of date. Her husband makes just a modest income, but in their home she enjoys the conveniences of the wealthy. How? Because everything that can be is being done electrically.

She began being proud of her kitchen years ago. She was one of the first. She started with an electric refrigerator. Then step by step, she added the electric range, and water heater and dishwasher.

TODAY SHE'S ENVIED

She's proud of her complete electric kitchen and she has a right to be.

Begin Being Proud of YOUR Kitchen.

Take the first step--go to any electric refrigerator store, select one of the gleaming new models big enough for your family, make a pleasantly small down payment. Economy, satisfaction, convenience beyond your hopes will be yours.
