Dear Bessie,

Now I want it distinctly understood that you must take care of yourself during this bad weather. You are running around too much I know. When I get hold of you I will wish you do to suit me. I don't want to find you with Rheumatism or Pneumonia or anything else. I hope you have held your own in flesh at least, for you have a precious little to spare.

The weather is simply beastly. Sleet, snow, rain, wind, ice and every thing else that bad behaved weather can be guilty of is constantly with us. I almost persuaded that it is of the us. Can it be a protest against our marrying? I sometimes think, and fear is father to the thought, that you do not care for me enough, but when I get your letters they are so sweet that all my fears leave and I feel like a new man. Oh Bessie, you do not know how necessary your love is to make me happy. You will never know how much I have been done for you. Heavens Bessie, I do not want
