Meet at: Assignment () City Room () Dept. Charged City

SUBJECT Meet John Huggins at Miller Steam Plant. The APCo is building the world's tallest hyperbolic cooling tower there - now is just ~ 80 ft but will be 550 ft in 1988. Shoot with rest of plant for perspective (first cooling tower is 450 ft tall.) and get a lot of sky, so art can draw in dotted line of outline

ADDRESS Miller Steam Plant, 674-5661, Take Hiway

REMARKS 78 North to Graysville, exit at Flatop Rd, go left about 7 miles. At sign for plant, turn left, 1 mile. of finished tower. A hyperbolic cooling tower looks like the towers at Three Mile Island []
