

county, Alabama, which is said to give every evidence of being inexhaustible and also very rich. From the best information we can get upon the subject, these mines are in the upper part of Randolph county or where it joins Cleburne, in the vicinity of what is known as Gold Ridge, which place is about twenty miles from this point, and about five or six from the line of this county.

The present works are upon the land of a gentleman by the name of Dick Woods, who before commencing operations, took specimens of the ore to Baltimore and had it assayed. There it was pronounced very rich—not surpassed by Cornwall, England. Mr. Woods upon his return home, being without means to work the mines properly, managed, we learn, to get capital advanced to him in Atlanta, upon the prospective promise of the mines. We have not been able to learn the force he has at work, but the parties driving the teams through here last Monday, state, that Mr. W. wants to get about twenty more wagons, and with that number, that he could hardly move the ore from the mines as fast as it was gotten out, and they also stated that a hand could get out a ton per day, so we infer from this, that he has a pretty respectable force at work.

The ore is said to be worth one hundred dollars per ton and to be very acid. The direction of Gold Ridge from this place is due west, and it is quite probable that this mine is connected with the copper mines of this county.

Carrollton Station is the nearest Railroad point to Gold Ridge and it is the intention of Mr. Woods to haul his ore to that place for shipment.—*Carrollton Times.*

How to Select Good Flour.

Look at its color; if it is white with a slightly yellowish or straw-colored tint, it is a good sign. 2. Examine its adhesiveness; wet and knead a little of it between the fingers, if it works soft and sticky it is poor. Flour made from spring wheat is likely to be sticky. 3. Throw a lump of dry flour against a dry, smooth, perpendicular surface, if it falls like powder, it is bad. 4. Squeeze some of the flour in your hand, if it retains the shape given by the pressure, that too is a good sign. Flour that will stand all these tests, is safe to buy. These modes were given by old flour dealers, and we make no apology for printing them, as they pertain to a matter that concerns everybody, namely, the quality of that which is the "staff of life."

M. E. CHURCH, SOUTH.

PROCEEDINGS OF THE GENERAL CONFERENCE.

Louisville, May 4.—But little of general importance was done in the conference to-day, except the presentation of an address signed by all the bishops. This address is very long and deals with the general condition of the church, and the progress of the world. It is a very able and interesting paper, and we regret that we cannot print it in full. It is a very able and interesting paper, and we regret that we cannot print it in full.

AN ADDRESS BY CASAL—Mr. Casal, a member of the conference, addressed the conference to-day, and made no apology for printing them, as they pertain to a matter that concerns everybody, namely, the quality of that which is the "staff of life."

THE CROPS.

PROSPECTS IN THE NORTH-WESTERN STATES.

INDIANAPOLIS, May 3.—The following is a synopsis of the leading information furnished yesterday by the National Crop Reporter: The unusual backwardness of the season has delayed very much all kinds of spring work, and at the date of the last full report, prepared April 15, there had been practically no seeding at all in the State of Minnesota, and but little planting in Wisconsin, at the date mentioned, about forty per cent. of the estimated area had been sown in wheat, and but little more than one-fourth of the oats. The average acres sown in wheat in the States of Illinois, Iowa, Missouri and Wisconsin were eighty-seven per cent. of the estimated probable total, sixty-two per cent. of the oats, and of potatoes, thirty per cent.

THE PROSPECTS OF THE FRUIT CROP TO DATE OF THE MOST ENCOURAGING CHARACTER, and the reported damage from frost, excepting in portions of Delaware and Maryland, is inconsiderable.

The condition of the roads at the date of the reports was, south of the forty-first parallel, uniformly bad, owing to the prevalence of hot weather, while north of that line the ground was generally frozen and the roads in fine condition.

Prices of leading articles the first half of April in the States of Illinois, Indiana, Iowa, Kansas, Minnesota, Missouri, Ohio and Wisconsin show a slight advance on corn, oats and hay, and a decline on swine and potatoes, wheat remaining unchanged.

COPPER.

Great Excitement in Randolph County Ala.

ONE TON TO THE HAY FOR FIVE DOLLARS AND FIFTY CENTS PER TON.

On last Monday there passed through this place on their way to the terminus of the Railroad, four two horse wagons, loaded with copper ore, taken from a mine in the upper part of Randolph

county, Alabama, which is said to give every evidence of being inexhaustible and also very rich. From the best information we can get upon the subject, these mines are in the upper part of Randolph county or where it joins Cleburne, in the vicinity of what is known as Gold Ridge, which place is about twenty miles from this point, and about five or six from the line of this county.

Pain-Killer.

1840. 1874.

Time Tests the Merits of all Things

THIRTY YEARS is certainly long enough time to test the efficacy of any medicine, and that the Pain-Killer has been tried by the people of this country for thirty years, and has been found to be a reliable and effective remedy, is a fact which is well known to all who have used it. It is a fact which is well known to all who have used it.

LOST IN LIFE.

The feeling of intense loneliness that often comes over the stranger in a great city, has been frequently noted and moralized by philosophical writers. The companionship that nature gives to one in field or forest is pitifully wanted out by the artificial and sterile of the leafless town, and to realize when thus isolated that in all the swarming thousands of human beings in the teeming streets you have not one friend or acquaintance; that not one of them all is aware of your personality in life or will give a thought to you, is a feeling which is well known to all who have used it.
