LOCAL ITEMS.

MR. C. B. CLEVELAND is our authorized agent at Linden.

Mr. T. H. Skinner is our authorized agent at Shiloh.

Mr. W. R. Forness is our authorized agent in the county.

Mr. James W. Ford is our authorized agent in the county.

Our agent at Linden, has blank mortgages—lien notes—for sale.

Local or editorial notices are inserted at twenty cents per line but a liberal discount is always made in favor of our regular patrons.

All Job Work must be paid for before it leaves the office.

200 oz Quinine,
250 bottles Morphine,
just received by
BAILEY & MILLER.

Ten pounds of fresh butter will pay one year's subscription to the Marengo News-Journal.

All sorts of country produce taken for subscriptions to the News-Journal. Eggs, butter, etc., will be received by our agent at Linden.

The American Sardinia Co.'s Bonitas Sardinians, are much better and less than half the cost of imported Sardinians.

Bring in advertisements as early in the week as possible.

One Dozen or Local Foam Bon Sale at the News-Journal Office. One dollar per dozen or three for twenty-five cents.

Two bushels of corn or potatoes or peas, delivered either at Demopolis or to our agent in Linden, will pay one year's subscription to the Marengo News-Journal.

REMEMBER, that contributions to the Firemen's Supper should be sent in to the Courtroom promptly by 5 o'clock Monday afternoon, 6th inst.

"Prayed out of town," are the words nailed on the doors of several saloons at Xenia, Ohio.

An exchange says woman's sphere is marriage. We never saw one yet that had any fear about it.

The Danbury philosopher observes that the pendency of expression worn by man who is "next" in a full barber's shop cannot be counterfeited.

The Livingston Journal, one of our most valuable exchanges, has put on a new dress, and is now, as it has ever been, one of the neatest and most ably edited papers in the State.

A new daily paper called the Selma Daily Echo, has been started in Selma by Messrs. Rice, Hooker & Neal. We wish the enterprise success.

Theodore Tilton says it is the hardest thing in the world to bow and smile when a man weighing two hundred pounds has stepped on your corn.

A Detroit hotel keeper writes his own bill of fare, thereby saving the cost of printing. It announces "Coffee, eggs, roast, beef, fried ham, boiled and baked potatoes, fried corn pudding and mince pie."

For Sale. The Cheapest Printing Office in the State. A good press, type, material &c. will be sold for less than one-half cost on easy terms.

M. C. BOWEN,
Demopolis, Alabama.

We acknowledge with pleasure the reception of an invitation to a ball to be given on April 23, at Masonic Hall, in Demopolis, for the benefit of Demopolis Lodge, No. 44, I. O. O. F. It will afford us great pleasure to attend.—Selma Times.

We notice several clever lots about town which look green and flourishing. Capt. McMiller, has already cut his Lucern clover and is ready to harvest. Think of this ye who raise all cotton, and plough half-starved mules. Don't you wish you had a ten acre lot ready for the scythe instead of a mortgage?

The next regular meeting of the County Council of Patrons of Husbandry will be held at Linden on the second (24) Saturday in April. H. A. Woolf, Esq., will deliver an address on the occasion. A full attendance is requested.

C. B. CLEVELAND,
Secretary.

An ambitious young lady was talking very loudly about her favorite authors, when a literary chap asked her if she liked Lamb. With a look of ineffable disgust, she answered that she cared little about what she ate, compared with knowledge.

"It was a crush"—the recent assembly ball at Washington. A correspondent notes how "Miss Nellie Grant went into the ballroom with a new puffed illusion that was garlanded with flowers. She came out in a 'cambric petticoat' from the kitchen."

The Demopolis District Conference M. E. Church, South, will convene at Gainesville, Sumter county, Ala., on the 10th, of April next. Rightly, Marvin, has consented to be present and preside. In the "Christian Advocate" the time was given as the 17th, but is now changed to the 10th, of April.

S. H. COX, P. E.

The coming poet in Demopolis, warbles: "The midnight, and the setting sun, Is rising in the wide, wide West; The rapid rivers slowly run; The frog is on his downy nest; The peevish ghost and sportive cow, Hilarious jump from bough to bough."

TEMPERANCE.—A good audience was out Wednesday night at the Presbyterian Church to hear the address of Rev. J. W. Phillips. The public installation of officers was very interesting. The rapid increase of the order and the great interest manifested in it by the community, indicate a steady advancement of the cause. The order here now numbers 65 members, and there are constant additions to the rolls.

Mr. Editor.—

Will you allow us space in your columns for the purpose of returning thanks to the donors of the elegant flags which were presented to our Club a few days since?

The pride with which we acknowledge their kindness is only surpassed by our admiration of the beauty and accomplishments of the givers.

"PATIENCE."

CEMETERY.—As the Spring is opening, the attention of the ladies of Demopolis is called to the necessity for cleaning and putting in order the cemetery. The excellent custom the ladies used to have, of making annual visits to the cemetery and putting it in order has fallen into disuse but we trust it will be revived. Let the ladies call a meeting and appoint a day for the purpose stated above. If all will unite in this labor of love, the cemetery ground can be made to present an improved appearance.

ALABAMA CENTRAL RAILROAD.—With the exception of a day or two immediately after the late floods of rain the Alabama Central trains have been running regularly making good time and the usual connections. The temporary suspension of trains was only from prudential considerations, the officers preferring a brief inconvenience to any risk however small. This road is the luckiest in the South—that is, it is lucky in having officers who understand their business.

The River, having risen to a point 8 or 10 feet below high water mark, is now subsiding, and, unless more rain falls, will soon be within its banks. The swamp opposite the city has been flooded so that hunters in skiffs were enabled to paddle through the woods and shoot hares by the earl load.

The rearing of thousands of big guns have been constantly awakening the echoes during the week, and many a poor "molly-cotton-tail" has been sent out of existence. A few turkeys have been killed but we have heard of no deer brought in town. Boats running as usual.

CHARADES AT LINDEN.—We learn that the charades and tableaux at Linden last week were, as we predicted they would be, decidedly successful. A large audience was present to enjoy the fine acting. We are informed that quite a number were present from Dayton. The recent rains and muddy roads deterred many Demopolis people from going down. It is to be hoped that the entertainment will be repeated when the weather becomes settled. After the charades were over the crowd adjourned to the ball room at the Hotel and had a grand dance. The floor was filled with dances and a most delightful evening was spent by the company. The ladies and gentlemen who went down from Demopolis express themselves as having greatly enjoyed the entertainment.

The announcement of Judge James Cobbs of Livingston, as a candidate for the office of Judge of the 7th Judicial Circuit at the next regular election, will be found in today's issue. The announcement is made subject to the decision of the Convention. Judge Cobbs is well known and highly respected throughout the circuit having filled a term of the office of Circuit Judge with distinguished ability and general satisfaction to the public. He is a profound lawyer and in every way fitted for the office which he is announced. His great moral worth and general excellence of character are known and appreciated, and his election would place an able and estimable citizen on the bench.

"That's right, boys," said an old gentleman to some boys who were playing marbles on the sidewalk, "I used to play marbles myself and I like to see you enjoy yourselves." The man, here stepped on one of the marbles, slid about six feet and sat down on a large glass plate. "If ever I catch you playing marbles around here again," said he, flourishing his cane, "I'll fall every one of you."

DIED.
In Demopolis, at the residence of M. C. Burke, Thursday 2d inst., Mrs. ADRIEN S. Burke, wife of Dr. M. P. Burke, in the 22d year of her age.

"Blessed are the pure in heart for they shall see God."

COMMERCIAL.

CONGRESSIONAL.

In the house, on the 16th, bills were introduced: For a commission in relation to the preservation of forests; to give land warrants to soldiers in the late war... A bill was passed, appropriating \$30,000 to be expended in the course of the current fiscal year in improving the mouth of the Mississippi... The house took a recess till 7:45 o'clock, the evening session to be exclusively for the discussion of the transportation question.

In the senate, on the 17th, various petitions were presented for and against a currency increase... The bill compensating the Louisville and Nashville railroad company for certain bridges destroyed during the war was passed... The remainder of the session was given to the discussion of the currency question, Mr. Logan, of Indiana, speaking at length in favor of increased circulation.

In the house, on the 17th, a bill for the relief of Willard Davies, late internal revenue collector of Kentucky, was taken up and passed after bill exempting Kansas and Missouri from the operation of the act of May 10, 1872, which forbids the pre-emption of iron and coal mines... The military committee reported a bill to provide for the gradual reduction of the army which was read and passed for the first Tuesday in April... The house went into committee of the whole on the legislation, the committee were concentrated in the bill.

The house then took a recess until 7:30 p. m., the evening session to be for debate on the transportation question. In the senate, on the 19th, after various unimportant memorials and petitions were disposed of, the bill to equalize the distribution of currency was taken up... After some discussion, was laid over... The army bill was considered, and the amendments reported by the committee were concurred in.

The most important of the committee's amendments reduces the house appropriation for pay of the army traveling expenses, etc., from \$4,400,000 to \$3,100,000, and increases the provision that more than ten cents per mile shall be allowed for traveling expenses. It reduces the house appropriation for subsistence from \$4,452,416 to \$2,400,000, and reduces the appropriation for quartermaster's supplies from \$4,500,000 to \$2,500,000. The appropriation for incidental expenses is reduced from \$1,800,000 to \$1,200,000, and that for the hire of quarters from \$1,400,000 to \$1,000,000. That for the preservation of clothing from \$1,000,000 to \$600,000, and that for the purchase of clothing from \$1,000,000 to \$600,000. The committee's amendments are reported that the house appropriation of \$10,000,000 for medical works for the army medical museum and surgeon-general's office be reduced to \$5,000,000, to-day advised that that amendment be withdrawn and the amount be left as fixed by the house. Pending the discussion the senate adjourned.

In the house, on the 18th, the session was devoted exclusively to debate on the bill to regulate interstate and railroad commerce, on which subject various speeches were delivered. The evening session was given to the bill to revise and consolidate the statutes. The attendance at both sessions was small, and the proceedings devoid of any general interest.

In the senate, on the 19th, a bill amendatory of the act to prevent the extermination of fur animals in Alaska was passed; also to authorize the employment of certain alien engineers and pilots; also appropriating \$10,000 to pay the expenses of the joint commission to investigate into the management of affairs in the District of Columbia. The rest of the session was consumed in considering the army appropriation bill.

In the house, on the 19th, the principal business was the consideration of the legislative, executive and judicial appropriation bill. But small progress was made.

In the senate, on the 20th, a resolution of the legislature of California was presented, protesting against any further subsidy to the Pacific Mail steamship company, and instructing senators and representatives from that state to use their influence to have articles five and six of the contract between the company and the United States government annulled, so as to discourage further immigration of Chinese.

The committee on public lands was discharged from its further consideration of the bill to equalize national bank circulation, under discussion for several weeks, he made the report for Monday next and it was so ordered.

After the expiration of the morning hour of consideration of the army appropriation bill. After several amendments were offered and rejected, the bill was passed. The fortification bill was taken up, and the amount appropriated by the bill for the next fiscal year, as reported by the committee, is \$900,000. The bill is amended to provide for the present fiscal year were \$320,000. The revised estimate is \$1,400,000. The amount appropriated for the next fiscal year is less than that appropriated for the present one. The fortification bill was amended so as to provide that appropriations therefor should be for the fiscal year ending June 30, and passed.

In the house, on the 20th, nearly the entire session was consumed in the discussion of District of Columbia affairs.

A Southern Corn Crop.

I have recently seen an experiment in corn planting which I think may prove instructive to some of my brother farmers of the south, at least. One acre of land near the city of New Orleans, before last, was taken under corn, and the vines were cut off, and sown broadcast with "cow peas." When the vines had reached their growth previous to flowering, sixty bushels of shelled corn was applied to them. The whole was then turned under with a two-horse plow. In this state the lot remained until last spring, when it was broken up and laid off three and one-half by three and one-half feet (I think), the vines were cut off, and the corn was planted in the rows. It received the usual cultivation of this section—that is, three plowings and two hoeings (except that it was not bedded). The acre yielded seventy-six and one-half bushels by actual measurement. The seed used is peculiar. It was selected by the gentleman who made the experiment, several years ago, from a volunteer stalk which had eleven ears on it, all of which, however, did not come to perfection. The yield of the stalk was five pounds of corn. This corn has become quite celebrated, and is one of the many proofs of the value of a careful selection. This year it yielded seventy-six and three-fourths bushels more than the northern farmers as anything remarkable, but if they will remember that our average is only ten bushels of corn per acre, they will at once see the value of the foregoing to southern agriculture. One bushel of peas will broadcast the acre and cost one dollar; the time here, scattered, will cost fifteen cents per bushel. The lot is now in wheat, and the wheat expects to produce twenty-five or thirty bushels, which for this country will be a good yield. The experiment will not cost much, and I am sure will repay any farmer. Clover, perhaps, will increase the yield of both wheat and corn, and the yield of both wheat and corn than eight outlets of we generally do.

John Carmichael, Habersham Co., Ga.

DURUM ROLES.—One quart flour, two eggs, one pint of milk, one tablespoon butter, one gill yeast. Beat the eggs and add the milk to them with the melted butter; pour this into the flour, having first put in the yeast. It must be mixed softer than bread, and if not moist enough, add more milk. Let it rise before baking.

Revolution in Southern Agriculture.

The Turf Field and Farm, of New York, conducted by a cosmopolitan, makes the following suggestions to southern farmers:

Your whole system of agriculture has been revolutionized. In the antebellum days you had at your disposal the best possible labor, because it was amenable to discipline, and, like a regular army, ever ready to obey the orders of the commander-in-chief. You have now lost by the arbitrament of the sword, the control of the forces which made your broad fields laugh with annual harvests, and now you are your- selves burdened with an enormous unproductive landed property, which is more heavily taxed than when it filled your store-houses, and garages, and barns, and furnished nine-tenths of the foreign exchanges of the whole union. What, under these circumstances, are you to do? Your labor is comparatively worthless, and your land without labor must inevitably, sooner or later, come under the hammer of the sheriff. You fancy the solution of the problem is to be found in one word, and that is grass.

Get your fields in sod, and pasture upon money value. Depend less upon the plow and the still more expensive hoe, and have recourse to the mow. If you have not the capital in labor, horses, implements, and manure, to get your land in grass in the speediest way, be not impatient or discouraged, have recourse to sheep; in time the poor creature will put on a pad, and the mowing of a flock of sheep. It may be objected that negroes and vagrant curs will prevent sheep breeding in the south. This objection has no weight; it is not insuperable. On the contrary, we may pluck safety from this danger, and be compelled to fold our sheep, a part of their management too often omitted, but which should never be neglected under any circumstances.

By means of the fold you effectually protect your flocks from night-riding dogs and their masters, and the better patches and galled spots in your fields are cleaned, or enriched by their tramping and their droppings.

Again, it may be objected that but a small portion of the cleared lands are adapted to grass, and that a certain extent this is true, but the fact is that southern planters, absorbed in the cultivation of tobacco, cotton and sugar, have never given sufficient thought to other agricultural products such as indispensable in their way as the three above named staples. In the balmy days of cotton culture in Mississippi the bread and meat was the exception. Most of them were corn buyers, and none of them raised pork. Most of them had cotton on the brain, and they all drenched grass as they would cholera, the boll worm and caterpillar.

Under the new dispensation you must of necessity give more attention to other possible farm products, and a chief among these are grass and cattle. For many years it is generally believed that except on stiff clays grass cannot be grown with profit on the tide-water lands of the southern states; but has it ever been attempted? Until the late war, and now it fails we must refuse to subscribe to the general belief.

Where is the grass which makes a finer or closer sod than the Bermuda, growing in many house yards in Mississippi, five and six feet high, and under the hot sun and light and heaviest tramping? Who has tried the new grass called Japan clover, which has appeared in some of the cotton states since the war? Who among the southern planters have tried this marvellous power of gypsum in growing clover and grass? Admitting that red clover will not stand the prolonged heat of a southern summer, there is a plant of the same family, and the south is adapted to it, the plant which flourishes in perennial verdure on the bleak mountains of Auvergne in France, and all around the Mediterranean, as far south as the catenates of the Nile, and the fertile lands of Egypt. This is the *medicago sativa*, the lucerne of Europe, and the alfalfa of California and South America. But southern farmers and planters neglected this, the most valuable of all the forage plants, because the days of slavery the cost of thinking of nothing but tobacco or cotton; and they neglect it now, and are deterred from its cultivation, under the erroneous impression that it must be drilled and cultivated with the hoe. The lucerne is between Alexandria and Cairo and Suez, in Egypt, it feeds thousands of acres knee-deep in lucerne which was never put in with the drill or touched with the hoe. Why should he who has the same climate and soil as Egypt, neglect to cultivate it? In conclusion, you will say purchase nothing you can do without; make your own bread and meat, and to do this successfully you must grow grass.

How to Caluminate.

To ten pounds of Paris white add half a pound of best white glue, and mix the glue for seven or eight hours in a tin pail containing half a gallon of warm water. Let it stand near the stove to keep warm. When about ready to mix up your materials, set the glue-pail in a kettle of boiling water, and stir it until it is all dissolved. The Paris white is to be put in a pail that you use for the work, and hot water stirred into it until it is thin enough for putting on with a brush, and the glue is then mixed with it, when the material is ready. It can be put on with a large sized common painter's brush, in the same manner that you spread paint, or use a whitewash brush. The brushes used by the calumniator may be had at the drug stores, and cost from four to eight dollars, but will do no better work than a common round brush, as stated above, and which will be the best in the hands of the calumniator. A very thin coat is the best, as a thick one may crack. You will have to thin the material with hot water from time to time. If you are careful, there is no need in sootering the wall with coarse carpenter's putty. Dip the end of the brush in as you would in paint and you will have no dripping.

One time I brought home a five dollar calumniating brush; but, after using it a day, the five dollar brush put it in a pail of water to soak, and the next day it was ruined. Clean your brush when you do with it, and put it away to dry. If put in water, see that the hand does not get wet, and no account percent the water to reach the upper end of the brush. You must bear in mind that an excess of glue, and sizing of flour that some people use, will make the white-wash scale off.

In one of George Sand's stories she makes a man say: "In one short hour I suffered death a thousand times over." But what was that to having a young man's paper-collar bust on him at an evening party?

Railroads in India.

The first railroad in India was completed and the first train of cars started in 1852. Since that time over five thousand miles of railway have been built and put into operation. The East India railway, northwest from Calcutta, extends fifteen hundred miles, and the Great India Peninsula railway, northwest from Bombay, with its branches, about the same length. Passengers by this line are now less than three days from Calcutta and Bombay, thus saving the long sea voyage around Cape Comorin. In spite of the restrictions of caste, railway traveling is very popular with all classes of the natives, who are packed promiscuously in the cars; and, in fact, this very mingling is doing more to break down the distinctions of caste, which have so long and so widely separated the different ranks, than could possibly be done by any appeal to reason or conscience. Science and civilization are thus rapidly breaking down the barriers of superstition and prejudice, and promoting practical brotherhood, and preparing the way for the progress of truth.

Come, Let Us Reason Together.—To the afflicted in body, we offer a few words of plain, practical reasoning. Man, under what form of sickness you labor there is one great truth you should ever keep in mind, viz: All disease originates in an impure condition of the blood. Purify that, and the disease must depart. If you have nothing to rely upon, you cannot purify the blood by the use of poisonous drugs, and exhaustive stimulants; the relief which these afford is temporary and deceptive. The best blood purifier ever discovered is Dr. Walker's famous Vinous Bitters, compounded of simple herbs. No matter how hopeless your case may seem, try a few draughts of this virtuous Dr. Walker, the discoverer of this priceless remedy, had been given up to die by the physicians, and is now a sound and healthy man from their use.

Dr. Pierce's Favorite Prescription is very strongly recommended by the Medical Faculty of the University of New York, and is highly praised by the female patients. It is worthy of all confidence, as may be seen from the following testimonial:

Dr. R. W. Pierce, Buffalo, N. Y.: "Dear Sir:—I have not words to express my gratitude to you for the cure of my disease, and in my case. There is not one who has used your medicines since they have been put on the market, who has not been greatly benefited. Since I have been so helped by its use six or seven months ago, I feel that I am now in a better state of health than I have been for many years. I have been cured of the same disease as mine. You do not know what a wonder it created in our family by restoring my sister I wrote you about, for she had been under the care of three of our best doctors, but could not get any relief. I tried your medicine, and in a few minutes at one time. I begged of her to try your medicines, and before she had used half of the bottle she was cured. I have now a healthy child, and have now just come home from a visit five miles away. Mrs. THOS. McFARLAND.

A HUMAN INSTITUTION, established fifteen years ago, for the cure of deformities of the spine, limbs and face, paralysis, palsy, catarrh, chronic diseases and diseases of the lungs, is the National Surgical Institute, Indianapolis, Indiana. It is the largest institution of the kind in the nation; has a capital stock of \$500,000, and cures thousands of sufferers annually. Send for the circular, which is mailed free to any address.

A BAR OF SOAP? Why, it is a bar of soap you will say, when asked. But the size of the bar, do you ever consider that? Many unprincipled dealers sell 12 oz. bars at the price of a full pound bar. Procter & Gamble's Extra Oat Soap is full weight 16 oz. bars.

AN OLD JUDGE, on being asked what he had the longest circuit court he had ever held, replied: "The longest circuit, as to distance, was when used to go to court a girl; to reach her house I had to make a circuit of eleven miles, but the time was a mere nothing."

MORE than fifty years have elapsed since Johnson's Anodyne Liniment was first invented, during which time hundreds of thousands have been benefited by its use. It is the most popular of all remedies, and is so universally popular with all classes as Johnson's Anodyne Liniment.

PILLS which contain antimony, quinine and calomel should be avoided, as they griping pains would be their only result. The safest, surest, and best pills are Parson's Purgative or Anti-Bilious Pills.

Go to Riverside Water Cure, Hamilton, Ill.

HOUSEHOLD Why Will You Suffer? To all persons suffering from rheumatism, neuralgia, cramps in the limbs or stomach, bilious colic, pain in the back, bowels or spine, we would say the Household Panacea, or Family Liniment, is all that is needed. It is a household necessity, and Family Liniment is all that is needed. It is a household necessity, and Family Liniment is all that is needed.

HOUSEHOLD PANACEA AND FAMILY LINIMENT.

THIRTY YEARS' EXPERIENCE OF AN OLD NURSE.

Mrs. Winslow's *Scotch Syrup* is the prescription of one of the best female physicians and nurses in the United States, and has been used for thirty years with never failing success by millions of mothers and children, from the feeble infant of one week old to the adult. It corrects acidity of the stomach, relieves wind colic, regulates the bowels, and gives rest, health and comfort to mother and child. We believe it to be the best and surest remedy in the world in all cases of dysentery, teething and diarrhoea in children, whether it arises from teething or from any other cause. Full directions for using will accompany each bottle. None genuine unless the fac-simile of CURTIS & BROWN'S is on the outside wrapper. Sold by all medicine dealers.

CHILDREN OFTEN LOOK PALE AND SICK. BROWN'S VERMIFUGE COGNETS will destroy worms without injury to the child, be perfectly WHITE and free from all coloring or other injurious ingredients usually used in worm preparations.

CURTIS & BROWN, Proprietors, No. 225 Fulton street, New York.
