improvements, and is fully prepared to cater to the tastes of the public in every particular. We keep constantly on hand fresh meats of all kinds, FISH, OYSTERS, GAME, and every other delicious article in the bestest way. We keep only prime and select meats, and our friends may be assured that our treatment and good fare.

THE EDITOR'S SOUTH.

Notes of the Southern Trip of the New York State Editors—Mineral and Other Resources of Alabama—Miscellaneous Hospitality—The Hope of the South, &c.

WASHINGTON, May 30th, 1874.

The New York editors, who have been upon an extended journey South, have everywhere met with a warm reception.

The Magic City of Alabama is surrounded by mountains, and which are being worked by several coal companies.

The latter ore is dug from the surface as one would dig dirt, and is said to be inexhaustible.

From Birmingham the party went to Tuscaloosa.

THE OLD STATE CAPITOL, and were handsomely entertained by the citizens and a committee of Alabama editors.

Byland Randolph, the chairman, welcomed them in a graceful manner, and his address was responded to by Mr. Pease of the Saratoga Sun.

Tuscaloosa has beautiful broad streets, with a line of oak trees running through the center of the State University.

Upright, Lunate Iron and several Ladies Seminars. Here as elsewhere the desire for immigration was very much expressed.

The party was divided up and entertained by the citizens at their residences.

The next day was devoted to Selma, a thriving city of the State. The New Yorkers were met by the authorities and a cornet band and escorted to an elegant hotel.

Speeches of welcome were made by the Mayor and Col. Saffold, President of the Alabama Association and editor of the Selma Daily Times.

This was responded to by Prof. Wilson and E. Randolph. After a fine dinner the city and a visit to a cotton warehouse, the party started for Montgomery.

Here we were met by the authorities and conducted in carriages to the Opelika Hotel, where they were welcomed by the Mayor.

At night the "Standard Club" gave a reception and ball in their hall, which was much enjoyed.

The cooling beverages of the southland were generously dispensed, while the feast of the next morning those of our ladies and gentlemen inclined to musical gaiety.

The next night a concert and reception were given by the Arlington Club. The State Capitol was an object of interest from all.

From Opelika the party proceeded to the Selma, Rome and Dalton railway, in charge of Col. Wood.

# GRANGERS' COLUMN.

Montgomery, Wednesday Evening, June 10, 1874

## GRANGERS' COLUMN.

### The Time to Plant Oats.

MONTGOMERY, June 10, 1874.

*Eds. Advertiser*—In this latitude oats left scattered on the ground germinate in September. It is, therefore, fair to presume that September is the natural and, therefore, the best time for planting. Success is the criterion. I have a field of red rust proof oats averaging about the same acre with three feet high, with fine, full heads, well developed and free from all traces of disease. They grow in bunches, numbers of which contain as many as seventy-five heads, the product of one single grain. The land was in oats last year. At the usual time the crop was taken off, and the grass and weeds suffered to grow without damage until the month of August, when they were plowed under with a two-horse plow turning plow with a view to enriching the soil for the fall sowing of oats. About three-fourths of a stand came up and grew off without damage from the cold rains of the winter or the floods of the early spring. The result is a crop of as fine grain as can be produced in any country and this, too, on what is considered to be "worn out, prairie soil."

I do not advocate August planting. I have only cited a few facts to show that September is not too early.

Yours,

[NOTE.—We have seen two sample bunches of the oats referred to in the foregoing letter. They grew each from a single grain and each contained 75 heads of the finest Alabama oats ever sown. We doubt that the finest grain lands of the Northwest ever produced better grain.—Eds. Adv.]

### Letter From Pine Level.

*Eds. Advertiser*—From the earliest recollections to the present time the farmers have had a disposition to be what they call independent, an independence that makes them rely on their individual strength, that fosters and cherishes selfishness, and that chokes out and destroys every vestige of sympathy and unity their nature and occupation justly demands. What has been the fate of their irregular system? and after centuries of experience, what has been the result? The whole matter? They have abused the design of the Almighty, worked discord and destruction into their ranks, degraded their calling, made themselves despised of water and hewers of wood, deprived their sons and daughters of the advantages of education, have failed to realize a fair remuneration for their capital and labor, entailed irredeemable mortgages upon their homesteads, brought bankruptcy into almost every locality, and have been forced under the lash of tyranny to an extreme where dependence is inevitable, and an active spirit of co-operation and a manly bearing in all things is no longer to be a question of future development. Hence we see the pressing necessity of the Grange work. Its platform of principles is sufficient to raise the now depressed and hardy sons of toil, to that incomparable position in society they justly merit. The ultimate object of this organization is for mutual instruction and protection, to lighten labor by diffusing the fruits of its aims and purposes, expand the mind by training the beautiful laws the Great Creator has established in the Universe, and to enlarge our views of Creative wisdom and power.

To those who read aright, history proves that in all ages society is for the many, and successful results of general welfare can be secured only by general effort. At one glance then we see what lies before us, a great work to be accomplished with the aid of time and the assistance of all our brother farmers. So let no one speak a word of despair, or cast a single impediment in its pathway of rapid progress. The work is so capacitated as to admit the prosecution of all lawful means and purposes to secure and protect every interest of the farmer however remote it may be.

We can recommend and urge the passage of such laws as will be of the greatest benefit to the greatest number. But in the absence of the law-making power we have to do the best we can. For instance we need a night law (call it what you please) properly on the statute books, to protect the hard earnings of the laboring man while he slumbers upon his couch of rest, and a speedy repeal of the act passed at last session of the Legislature, which turns foot-loose a majority of the criminals when caught. This threatening the peace of the community in the land must be stopped.

When we take a retrospect of the past the future becomes more and more alarming. We are now on the verge of starvation, and the way we are suffering from these night laws is unendurable. Now to give some idea of this monster, I can safely say that within six months time was stolen from the farmers in a space five miles square of Pine Level vicinity not less than from five to ten dollars worth of farm effects, and on a square of very nearly twice the deposit of the same and the loser if not a good portion of the direct thieves. The hellish affair still goes on, but what shall we do for immediate relief? Farmers who are suffering from these night laws, what conclusion will you make in the premises? Here you see again we need a united effort. If you wish to reap any benefit from the farms you are working, you must have a better think and act a little while you are going along. We must have a strong nerve, stand firm, do away with policy and the devil will certainly flee.

Now in conclusion I will say a plan suggested by the laws of the land will be suggested before long, that if properly executed will make your effects secure when night-fall comes. You must come squarely up to the mark and be what you ought to be. Give the sentiment your careful consideration and let us be a band of brothers. In unity there is strength.

A. H. TOWNSEND.

Pine Level, Ala., May 20, 1874.

### The Cotton Crop and the Condition of the South.

A prominent commission merchant of Alabama, who has recently returned from a trip through the Southern States, gives the following observations to the Cincinnati Commercial. The principal cotton crop in the South is now in the hands of the planters. The crop is generally good, but the condition of the South is such that the crop will be sold at a low price. The planters are in a desperate straits, and the crop will be sold at a low price. The planters are in a desperate straits, and the crop will be sold at a low price.
