Died in Richmond 5th, Mrs. Eliza Alexander, daughter of the late Rev. John Newland Maffit.

Married in Richmond 3rd, J. W. Rion and Jennie McGee.

Married in Richmond 4th, Walter L. Jones and Archie Davis.

Married near Richmond 17th ult., Dr. J. A. Gibson and Jennie Anderson.

Navasota had a Purim ball.

Married in Bryan 3rd, I. S. Curtis, of Navasota, and Fannie Owens, of Aberdeen, Mississippi.

Anderson has a grant of Patrons of Husbandry, W. D. Thomas, master; P. M. Thompson, secretary.

The 2nd of March, the anniversary of Texas Independence, is made a legal holiday.

The 21st of April, the anniversary of the battle of San Jacinto, is made a legal holiday.

Blanco Indian men and one squaw were recently killed in a fight on the upper Brazos.

Navarro county will have an unusual amount of small grains of all kinds this season.

Red River county will have plenty of corn, wheat, and oats.

Wichita City is the name of a new town in Clay County.

There is plenty of iron ore in Travis county.

Corn is worth eighty cents a bushel in Grims county.

The wheat prospect in McLennan County is promising.

There has been a good deal of sickness in Lamar county.

John W. Kavanaugh has recently died in Lamar county.

Horse thieves are operating in the upper part of Hopkins county.

The school house at Searsville was recently burned.

The Purim Ball at Waco was given the 13th.

Waco has a grant of Patrons of Husbandry, General J. W. Spaight, master; W. L. Prather, secretary.

The wife of Hon. T. G. Allison of Panola county is dead.

Married in Navasota the 25th ult., J. W. Brooks of Austin and Jennie J. Patterson.

Fourteen deaths in San Antonio in February.

Judge Thornton of the twenty-fourth judicial district has resigned.

There was a grand masquerade ball in Austin the 7th.

In February, 1860, head of stock were shipped north to Austin.

Dead in Austin 3rd, Mrs. M. A. Goodrich.

The other day there were twenty-two persons in the dungeon of the jail at Austin—a room fifteen feet square.

Joe Robinson of Live Oak county has lived in Texas fifty-two years.

THE FARM AND HOME.

(From the Farmers' Vindicator.)

HOW TO RAISE COTTON CHEAPLY.

I desire to lay before your readers my views on the way to raise cheap cotton, and if in doing this I shall say some things that have often been repeated in your paper, I shall not be ashamed, for, as the importance of the subject, and the necessities of the people, that the facts concerning it should be everywhere known; not published only, but repeated again and again, until the way to raise cotton cheaply is as well known as the fact that cotton must be raised.

This then is the question, how shall cotton be grown at the lowest possible cost? And in writing on this subject, I shall not allude to the different persons in various sections, in cultivating and harvesting this crop, nor to the implements used, or fertilizers applied, but I shall confine myself to those principles which are the same everywhere, leaving the means of carrying them out to be suggested to each cotton grower by the circumstances that surround him.

My first remark is in regard to the land cultivated. In order that cotton may be grown at the lowest possible cost, the land must be the best, and the most fertile.

As the land cultivated yields more abundantly, so will the cost of producing this staple be lessened, and as the yield per acre progresses towards perfection, the cost progresses towards its lowest limit.

For in the first place, the cost of cultivating the crop is the same, whether the field be good or bad, and the same in preparing the ground, the same in plowing and hoeing, whether the result be one or four bales; making the cost in one case less than in the other. Again there is the same cost of seedling, the same cost of sowing, the same cost of weeding, the same cost of picking, the same cost of ginning, the same cost of pressing, the same cost of shipping, the same cost of selling, the same cost of everything else that enters into the production of the crop, the only difference being in the yield.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

THE FARM AND HOME.

(From the Farmers' Vindicator.)

HOW TO RAISE COTTON CHEAPLY.

I desire to lay before your readers my views on the way to raise cheap cotton, and if in doing this I shall say some things that have often been repeated in your paper, I shall not be ashamed, for, as the importance of the subject, and the necessities of the people, that the facts concerning it should be everywhere known; not published only, but repeated again and again, until the way to raise cotton cheaply is as well known as the fact that cotton must be raised.

This then is the question, how shall cotton be grown at the lowest possible cost? And in writing on this subject, I shall not allude to the different persons in various sections, in cultivating and harvesting this crop, nor to the implements used, or fertilizers applied, but I shall confine myself to those principles which are the same everywhere, leaving the means of carrying them out to be suggested to each cotton grower by the circumstances that surround him.

My first remark is in regard to the land cultivated. In order that cotton may be grown at the lowest possible cost, the land must be the best, and the most fertile.

As the land cultivated yields more abundantly, so will the cost of producing this staple be lessened, and as the yield per acre progresses towards perfection, the cost progresses towards its lowest limit.

For in the first place, the cost of cultivating the crop is the same, whether the field be good or bad, and the same in preparing the ground, the same in plowing and hoeing, whether the result be one or four bales; making the cost in one case less than in the other. Again there is the same cost of seedling, the same cost of sowing, the same cost of weeding, the same cost of picking, the same cost of ginning, the same cost of pressing, the same cost of shipping, the same cost of selling, the same cost of everything else that enters into the production of the crop, the only difference being in the yield.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater the yield per acre, the more the farmer will be able to afford to pay for the land, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Therefore, the more the land yields, the less the cost per bale, and the more the land yields, the more the farmer will be able to afford to pay for the land.

Again, the greater

The Southern Argus.
SELMA, FRIDAY, MARCH 20, 1874.
CITY AND COUNTY.
HEREAFTER, for transient advertisements
the Argus will charge one dollar a square for
the first, and fifty cents a square for each subse-
quent insertion.
The Criminal Court grand jury returned
twenty-three indictments.
REGULAR trips over the Alabama Central
road were resumed on Thursday.
MARRIED in this city, the 8th, by Judge
Conoley, J. F. Fitch and Miss M. E. Duckworth.
We learn that Dr. W. C. Cleveland will
preach at Stillkill church the fifth Sunday in this
month—next Sunday evening.
Trains on the Selma, Rome, and Dal-
ton road now leave here at 8:10 a. m. daily, and
arrive here at 9:35 a. m. daily.
SUNDAY, the river has risen to
within about two feet of the high water of 1873,
and at this writing (Thursday noon) is rising fast.
REYNOLDS, son of Captain Hugh Har-
nall, aged about three years, died at the residence
of Mr. Reynolds, in Talladega county, on Tues-
day last.
The criminal court grand jury re-
turned the poorhouse "in a very bad condition, and
rather a disgrace than a benefit to the county
and people."
The Selma and Montgomery road is
heavily broken. We have had no trains over it
since Sunday. We shall probably have none for a
day or two yet.
The Peerless, after losing two trips in
consequence of a broken shaft, put in her ap-
pearance on time last week, and will be on land
regularly hereafter.
The Selma, Rome, and Dalton Road
has sustained no serious injury, and its trains have
made every trip this week, affording us our only
means of communication with the outside world.
JENKINS HARRISON (negro), senior, from
Dallas county, was tried in the criminal court,
before a solid negro jury, last week, and acquitted
on the charge of stealing a long gun from
against him.
JUDGES THOMAS A. WALKER was on Mon-
day last, dangerously ill on his plantation near
Bellevue; but his friends thought the state
would be glad to know that he is now in the city,
and convalescing.
CHARLES T. BROWN, the popular jeweler,
with an eye for the beautiful himself, and a nat-
ural appreciation of our own taste, has sent us
a charming little chronicle, whose bright colors
and delicate tints will be a thing of joy in
our office.
MARRIED, at the residence of the bride's
father, in Due West, South Carolina, the 4th
inst., by Rev. W. M. Grier, assisted by Rev. N. J.
Presley, Mr. W. T. Walker, son of Mr. W. T.
Walker, of this city, and Miss Kittie L., daughter
of Rev. J. J. Bonner.
Mrs. T. S. Bowen and Mrs. Euclid
Johnson, of this city, have the heartiest sym-
pathy of the entire community in the heavy
sorrow which befalls them in the sudden
death of their estimable and beloved mother,
Mrs. Fielding Snow, in Jacksonville, the 15th.
The Alabama Central Road sustained
no damage by the recent rains; but as a conse-
quence of abundant rainfall, the management now
trains over it in other way Monday, Tuesday,
or Wednesday, thinking it better to lose the
business of these days than to risk life and property.
There was a general disappointment on
Monday night last in consequence of the un-
available future of Mr. John E. Owen to reach
here, and expressions of regret everywhere
expressed. On Friday and Saturday nearly three
hundred reserved seats had been sold, and every
inch of space in the great depot of Selma was
filled to the brim with passengers. For the
which fell in the night of Monday. One per-
son was killed and the great calamity, and
we are glad they are to be gratified. Mr. Owen
will be here to-morrow (Saturday) night, D. V.

ALABAMA NEWS.
After a suspension of several weeks, the
publication of the Alabama News has been
resumed.
Rev. M. N. Eley is a candidate for pro-
bate judge of Bullock county.
For some time there has been a single
prisoner in the Dale county jail.
There being no other prisoner for it, the Dale
county jail is used for a dancing hall.
Patrick Brady of Tuscaloosa committed
suicide the 10th.
Rev. Jefferson Falkner of Montgomery
has been ill.
Tomatoes and lettuce are sold now in the
Montgomery market.
Mr. William Allen, a geography operator in
Montgomery, has been transferred to Key
West.
A musical association has been formed in
Demopolis; T. G. Cornish president, Dr.
E. H. C. Bailey vice president, T. B. Gray,
son musical director, Cornish treasurer,
and E. H. Tallichet secretary.
Demopolis has a base ball club with
twenty-five members.
The Pickens county physicians were to
have had a county meeting last Monday.
Pickens circuit court began its spring
term last Monday.
